MOBILE **SMART** REPAIR

At Mobile SMART Repair UK, we work alongside reputable businesses to ensure that their fleet of vehicles receives professional touch-ups and bodywork maintenance, keeping them looking their best on the roads.

ABOUT US

Offering cosmetic, dent and paint repairs to the Yorkshire and the Humber region, MobileSMARTRepair.uk is the perfect partner for ensuring your corporate fleet, dealership/trade portfolio and other business vehicles are highly maintained.

As an independent provider of mobile SMART repair services for retail and businesses, we have conducted extensive market research to ensure we offer a B2B package that suits the businesses we serve.

We aim to set ourselves apart, knowing that many businesses in Leeds and the surrounding Yorkshire areas can struggle with the resources required for larger repair companies or the commitment required by their lengthy repair contracts.

We offer flexible, cost-effective services that help keep your fleet of vehicles in top shape without the hassle of long-term agreements or excessive costs.

OUR PARTNERSHIP

With fleet, commercial and retail vehicles, we offer a favoured pricing structure as standard. Our technicians can become an integral part of operations, compliance, supply chains, and vehicle-related duties of facilities management and maintenance.

Another core aspect of B2B SMART repairs is used car sales and dealerships. Business managers in this sector can always benefit from a trusted partnership with a SMART repairer.

In both the above industries, we recommend our day rate model, since it is ideally suited to fleet operators, dealerships, and businesses seeking a scalable, consistent and affordable repair partner.

We can be at your facility or premises as regularly as you need us to be to keep your daily operations going. The mobile advantage is that we come to you!

What We Offer from our Mobile Repair Services for Businesses

We recognise that businesses require predictable costs, long-term solutions, and consistency with their contracts/services. We can work alongside your business to provide the following as part of your ongoing partnership with us:

- 30-day standard invoicing terms.
- A priority service offering - we can commit to the time and dates that suit you (up to 3 months in advance).
- Onsite assessments - we can conduct in-person damage reports on any of our visits.
- Custom packages and virtually no minimum contracted days.
- An efficient and productive approach that helps you achieve the best cost per repair rate.
- Independent advice and guidance, with a non-biased approach to ensure transparent review of damages and repairs involved.

OUR PACKAGES

It's likely you will have ongoing vehicle repair requirements when running a business, which is why our day rate contracts are an efficient alternative to our ad hoc pricing.

By batching repairs into a single visit, you can enjoy the convenience of a dedicated service window, streamlined admin and improved turnaround times all through grouped repairs.

Day rate packages enable our technicians to complete multiple repairs within your allocated service day. This structure delivers scalable savings compared to invoicing each repair individually.

Favourable single-job pricing *can* start from one time costs of*:

Bumper corner: £90

Front wing: £130

Door: £150

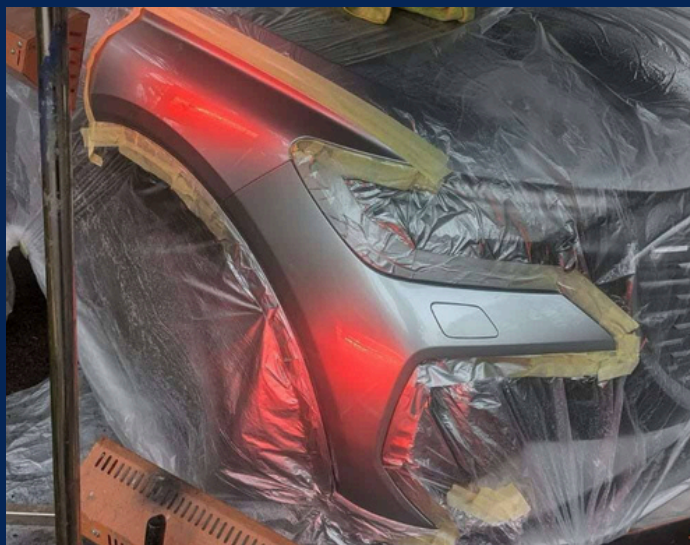

Quarter panel: £150

Bonnet: £200

Tailgate: £150

Alternatively, we can establish a retainer and fulfil as many jobs as possible in a day-rate time frame.

Day rate packages start from £375*

*All prices listed are starting from rates and are subject to variation. Final costs may vary based on location, urgency, seasonal demand, contract terms, and other operational factors

OUR CONTRACTS

Already have an existing contract in place? We're happy to work alongside other repairers in the area. There's enough work to go around!

"We would definitely recommend Mobile Smart Repair UK to anyone - its a great service, prompt, efficient and reliable. All works were completed the same day to a very high standard and the space was left very clean and tidy."

Trustpilot Review

Basics of our Contracts

In order to remain transparent and trusted, we will always inform you of the basics of our contracts before you request one. These are un-negotiable as they help us keep our business running, just like yours:

- **Initial Term:** Contracts require a minimum commitment of 3 months. This allows us to allocate your preferred days into our service calendar and maintain consistency.
- **Minimum Usage:** The minimum use is 1 contracted day per month - a very low threshold designed to keep your agreement flexible and easily budgeted.
- **Single-Job Pricing:** Final costs may be revised following on-site inspection, to account for discrepancies in the reported damage and ensure a thorough, lasting repair. This is only done when absolutely necessary.
- **Previous Repairs:** We may decline to carry out work on vehicles that have recently been repaired—only where we believe previous work may compromise the quality or durability of our own.
